Other Services

- Secure Code Review

Our Team

We have trusted and competent talents who are highly skilled in discovering vulnerabilities and conducting penetration testing based on industry standards and customized in-house built methodologies. Throughout the years, our consultants have executed many projects and achieved exceptional results, in which zero days were discovered and many bugs were hunted. Our team is always up to date with the latest ethical hacking techniques, and are actively updating our methodologies to cope with new threats.

Our Reputation

Research-oriented assessment We depend on manual tests to identify unknown vulnerabilities that might exist in target systems such as zero-day vulnerabilities. Therefore, we facilitate research capabilities for the security experts to utilize throughout the projects and for skills development.

High-quality services We adopt quality assurance processes to offer high-quality services. The quality of our services is supported by demonstrable capabilities with effective and proven security assessment methodologies that are tailored for each environment type.

World-renowned security researchers Our world-renowned security experts are qualified and competent in their areas of specialization. The passion is behind the determination of iSec security consultants to always produce results that make us proud of what we do.
